## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 10, 2006 has been entered.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-5, 11, 13-14, 16-17, 19-21, 23-28, 31-33, 35-39, 68-69, 71-72, 77, 79-80 and 82-86 have been considered but are moot in view of the new ground(s) of rejection.

The Examiner agrees that there is support for the "substantially uniform light field." However the new limitation wherein the activation occurs immediately after purging is not supported by the specification as filed.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4, 11, 13-14, 16-17, 20-21, 23-28, 31, 35-39, 68-69, 71-72, 77, 79-80 and 82-86 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not

described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification fails to disclose applying light or activating the agent *immediately* after the purging step. The activating step is only disclosed as occurring immediately after the *diagnosis* step. The specification states:

“Additionally, the step of *diagnosing* can almost immediately be followed by the steps of applying a PDT agent, purging excess agent and applying light so that said method of diagnosis and treatment is done in a single procedure. If PDT agent uptake is used to diagnose or detect diseased tissue, the step of *diagnosing* can be immediately followed by the step of applying activating light. Alternatively, there may be an indefinite delay between diagnosis and PDT treatment” (emphasis added).

Possible amendments may include language such as “within a single procedure” however further consideration would still be required.
